

CodersBee for Schools

Coding & AI, taught by your own teachers. A school overview.

Who we are

CodersBee was founded by Manisha - M.Tech (Computer Science), Advanced Certificate in Coding (College of DuPage, Chicago), and 15+ years teaching children to code. She still writes every lesson and teaches every day - that teacher's eye is built into everything your school receives.

- 15+ years teaching kids coding and AI
- 1,000+ students taught, across 10+ countries
- 5.0 rating - 100% recommend on Facebook
- 58+ structured lessons across two curriculum tracks

How we're different

- **Games first, code always.** Every hard idea - loops, APIs, machine learning - arrives as a game the child plays, then rebuilds in real Python.
- **Your teachers, trained by us, owned by you.** We certify your teachers on the full curriculum - the capability stays at your school permanently, not tied to an ongoing contract.
- **Your school's own brand.** Your logo, your own login page and subdomain, co-branded certificates.
- **Nothing to install.** Runs in the browser on any Chromebook or laptop you already own. Students sign in with just a username - no email, phone number, or photo required.

What we offer

Python & AI PlayCamp - first print() through Python fundamentals, APIs and machine learning; 20+ lessons, each with its own hands-on game.

Advanced Agentic AI PlayCamp - for students who know Python: prompts, real ML models, agents and RAG; 38 lessons ending in a student-built AI agent.

- Teacher Training program - the same one CodersBee's own teachers complete
- Teacher dashboards - attendance, homework, class progress at a glance
- QR-verified certificates, co-branded with your school's name
- Student maker portfolios - a shareable page of each child's projects

The rollout

Week 0: a 30-minute call → Week 1: your co-branded space is live → Weeks 2-5: your teachers train at their own pace → Week 6: first classes run → Term end: certificates, portfolios, and a decision on scaling up.

The One-Classroom Pilot: start with a single grade for one term. Full setup, full training, full co-branding. If it does not earn its place in your timetable, walk away - no lock-in.

See it live

Open a real, working co-branded school account right now: codersbee.com/login?school=demoschool

Book a 30-minute demo - you will hear back from Manisha within 24 hours - codersbee.com/schools
